Journal of Wind Engineering and Industrial Aerodynamics

Contents Volume 33 (1990)

Vol. 33 Nos. 1–2: Special Issue on Bluff Body Aerodynamics and its Applications

Preface vii
Introduction ..... ix–x
Speech at the Conference Party ..... xiii–xiv

Fundamental studies

Recent research into bluff-body flutter
Y. Nakamura (Kasuga, Japan) 1
Turbulence and blockage effects on two dimensional rectangular cylinders
A. Laneville (Sherbrooke, Quebec, Canada) 11
Bluff-body aerodynamics influence on transport and diffusion
R.N. Meroney (Fort Collins, CO, U.S.A.) 21
Performance of the tolerant tunnel for bluff body testing
G.V. Parkinson and M. Hameury (Vancouver, B.C., Canada) 35
Some effects of free-stream turbulence on the flow past a cantilevered circular cylinder
Y. Uematsu, M. Yamada and K. Ishii (Sendai, Japan) 43
Conceptual overview of laminar and turbulent flows past smooth and rough circular cylinders
M.M. Zdravkovich (Salford, U.K.) 53
Aerodynamic behavior of inclined circular cylinders — cable aerodynamics
M. Matsumoto, N. Shiraishi (Kyoto, Japan), M. Kitazawa (Kobe, Japan), C. Knisley, H. Shirato (Kyoto, Japan), Y. Kim (South Korea) and M. Tsujii (Kyoto, Japan) 63
Analytical study on gowth mechanism of rain vibration of cables
H. Yamaguchi (Urawa, Japan) 73
Force-displacement measurements on closely spaced tandem cylinders
C.W. Knilsey and M. Kawagoe (Kyoto, Japan) 81
Aerodynamic instabilities of twin circular cylinders
M. Matsumoto, N. Shiraishi and H. Shirato (Kyoto, Japan) 91
Vortex-included oscillation of two dimensional rectangular cylinders in large scale turbulence
H. Kobayashi (Kyoto, Japan), M. Kawatani (Osaka, Japan) and O. Nakada (Hiroshima, Japan) 101
Some observations of the effect of aspect ratio on the influence of turbulence on the drag of rectangler cylinders
B.E. Lee (Hong Kong) 107
Drag and lift on rectangular bluff bodies immersed in deep boundary layer flow over rough surfaces
J. Wacker, R. Friedrich, E.J. Plate and F. Dorsch (Karlsruhe, F.R.G.) 113
Aerodynamic responses and pressure function of shallow H-section cylinder
Y. Kubo and K. Hirata (Kitakyushu, Japan) 123
On self-excited oscillation of the cable trussed roof with single curvature
T. Matsumoto (Kanazawa, Japan) 131

Numerical aerodynamics

Numerical simulation of turbulent flowfield around cubic model, current status and applications of k-ϵ model and LES
S. Murakami (Tokyo, Japan) 139
Discrete vortex simulation for flow around a circular cylinder with a splitter plate
H. Kawai (Saitama, Japan) 153
Numerical study of aerodynamic behavior of a square cylinder
T. Tamura (Tokyo, Japan) and K. Kuwahara (Kanagawa, Japan) 161
Numerical simulation of flow around rectangular cylinders
A. Okajima (Kanazawa, Japan) 171

Aerodynamics of buildings and towers

Progress and problems in the prediction of the response of prototype structures to vortex-induced excitation
B.J. Vickery (London, Ont., Canada) 181
A review of recent experiments on the flow past circular cylinders
H.-J. Niemann and N. Hölscher (Bochum, F.R.G.) 197
Practical experiences with wind-induced vibrations
H. Ruscheweyh (Aachen, F.R.G.) 211
Analysis and synthesis of pressure fluctuations on bluff bodies using eigenvectors
J.D. Holmes (Highett, Vic., Australia) 219
Elastic model of reinforced concrete chimney for wind tunnel testing
Y. Tamura (Kanagawa, Japan) and I. Nishimura (Tokyo, Japan) 231
Aerodynamic shape effects of tall building for vortex induced vibration
H. Hayashida and Y. Iwasa (Tokyo, Japan) 237
Recent developments in full-scale wind pressure measurements in Japan
J. Kanda (Tokyo, Japan) and T. Ohkuma (Yokohama, Japan) 243
Chiba Port Tower: Full-scale measurement of wind actions (Part 2). Basic properties of fluctuating wind pressures
S. Kawabata (Ichihara, Japan), T. Ohkuma (Yokohama, Japan), J. Kanda, H. Kitamura and K. Ohtake (Tokyo, Japan) 253
Wind-induced vibration of tower and practical applications of tuned sloshing damper
K. Fujii (Tokyo, Japan), Y. Tamura (Kanagawa, Japan), T. Sato and T. Wakahara 263
On the suppression of vibrations using nutation dampers
V.J. Modi, F. Welt and M.B. Irani (Vancouver, B.C., Canada) 273

Bridge aerodynamics

Similitude and modelling in wind tunnel testing of bridges
H. Tanaka (Ottawa, Ont., Canada) 283
Wind effects on bridges
R.L. Wardlaw (Ottawa, Ont., Canada) 301
Wind tunnel study of long-span suspension bridge under smooth and turbulent flow
Y. Fujino, M. Ito, I. Shino, M. Iwamoto (Tokyo, Japan), Y. Hikami, M. Tatsumi and T. Miyata (Yokohama, Japan) 313
On aerodynamic stability of double-decked/trussed girder for cable-stayed "Higashi-Kobe Bridge"
T. Saito (Nagasaki, Japan), N. Shiraishi (Kyoto, Japan) and H. Ishizaki (Osaka, Japan) 323

Mechanism of aerodynamic stabilization for long-span suspension bridge with stiffening truss-girder
T. Ueda (Osaka, Japan), M. Yasuda (Kobe, Japan) and R. Nakagaki (Osaka, Japan) 333
Coupled flutter estimate of a suspension bridge
T. Miyata and H. Yamada (Yokohama, Japan) 341
Aerodynamic stability of the tower of a long-spanned cable-stayed bridge (Higashi-Kobe Bridge)
K. Ogawa (Akashi, Japan), M. Matsumoto (Kyoto, Japan), M. Kitazawa and T. Yamasaki (Kobe, Japan) 349
Effects of geometrical shape on vortex-induced oscillations of bridge tower
T. Takeuchi (Kanagawa, Japan) 359
Aerodynamic stability of Kansai International Airport access bridge
A. Honda (Nagasaki, Japan), N. Shiraishi (Kyoto, Japan) and S. Motoyama (Kansai, Japan) 369
Effects of under-girder clearance on aerodynamic response of box girder bridges
M. Miyazaki (Hiratsuka, Japan) and M. Ito (Tokyo, Japan) 377
Reliability of bridge structures under wind loading: consideration of uncertainties of wind load parameters
P.H.W. Prenninger, M. Matsumoto, N. Shiraishi, C. Isumi and Y. Tsukiyama (Kyoto, Japan) 385
On the proposed wind resistant design manual for highway bridges in Japan
K. Yokoyama and H. Sato (Ibaraki, Japan) 395

Fluid-dynamics problems of reactions and ground vehicles

Flow-induced vibration and fluid–structure interaction in nuclear power plant components
K. Fujita (Takasago, Japan) 405
Application of computers to automobile aerodynamics
M. Takagi (Yokosuka, Japan) 419
The assessment of wind tunnel testing techniques for ground vehicles in cross winds
C.J. Baker and C.G. Robinson (Nottingham, U.K.) 429

Discussions 439

ICBBAA workshop reports

Wind Engineering Database 455
Mechanism of Flow-Induced Vibration 457

Vol. 33 No. 3

Some further thoughts on the spectrum of gustiness in strong winds
R.I. Harris (Bedford, U.K.) 461
A note on the design of screen-filled wide-angle diffusers
C. Farell and L. Xia (Minneapolis, MN, U.S.A.) 479
Expert systems in wind engineering
D.A. Reed (Seattle, WA, U.S.A.) 487
Reliability analysis of wind-sensitive structures
A. Kareem (Houston, TX, U.S.A.) 495

Predicted aerodynamic performance of of a horizontal-axis wind turbine equipped with vortex generators
A.A. Afjeh, T.G. Keith (Toledo, OH, U.S.A.) and A. Fateh (Seattle, WA, U.S.A.) 515
Streamwise oscillation of a cylinder at large reduced velocity
H.T. Low, Y.T. Chew and K.T. Tan (Singapore, Singapore) 531
Evaluation of stability corrections in wind speed profiles over the North Sea
A.J.M. van Wijk (Utrecht, The Netherlands), A.C.M. Beljaars, A.A.M. Holtslag (De Bilt, The Netherlands) and W.C. Turkenburg (Utrecht, The Netherlands) 551
